

Im looking for feedback on a frozen Lasagna (to start) Business called Pancho's Poppin Foods. It's a recipe I have developed for over a decade and had many different experiences making Veggie, Meat and some Vegan varieties. People love the recipe and I'm wanting to use BAYC 7217 Pancho Poppins and BAKC Little Fella as #6321

as Brand Ambassadors for this frozen food and event catering Lasagna.

Here is the website I put up as preliminary page <https://www.poppinfoods.com/>

The idea is that Frozen lasagna will be distributed through grocery chains and mail order like a Hello fresh model as well as catered for live events off a food truck

Looking at a monthly subscription model that could be discounted if apecoin is used. additional merch etc sold in apecoin both in otherside and web 2 .com worlds

I imagine partners for co-packing and ghost kitchens as well as supporting other brands like Bored and Hungry ape water etc.

Please take a look. I would love to get this off the ground but could use some connections and startup money to complete the vision.

working on a portion of proceeds going toward a not for profit vision [foodoasis.org](http://foodoasis.org) to bring fresh food to food deserts

I have secured the eth address as well as domains.

Ideas and feedback / resources
