## Parameters Breakdown

### Snapshot Voting

During the month, there were a total of 5 Snapshot Votes, which were considered for the assignment of scores by SV. It is important to note that only those proposals that ended in July were counted. These are the proposals that were taken into account:

1. [Approval of STEP committee recommendations](#)
2. [Improving Predictability in Arbitrum DAO's Operations](#)
3. [Pilot for a Questbook Jumpstart fund for problem definition and DAO improvement](#)
4. [Furucombo's Misuse of Funds](#)
5. [Change Arbitrum Expansion Program to allow deployments of new Orbit chains on any blockchain](#)

### Tally Voting

For this month, there were a total of 2 Tally Votes considered for TV scoring. It is important to note that only those proposals that ended in July were counted. These are the proposals that were considered:

1. [\[Non-Constitutional\] - Subsidy Fund Proposal from the ADPC](#)
2. [\[NON-CONSTITUTIONAL\] Pilot Phase: Arbitrum Ventures Initiative](#)

## Communication Rationale

For the CR, the published rationals of all the votes of the month were considered, taking into account Snapshot and Tally, that is to say, that to obtain the maximum qualification in this aspect a delegate had to express his rational of all the votes of the month, in other words, 7 (5 Snapshot + 2 Tally).

### Commenting in proposals

The 5 Snapshot proposals were considered.
