

Hello all,

I am doing research to see what the best wallet might be to use for AAVE that would be safe and that might also be the easiest to use while also offering some kind of phone assistance where I can talk to a person if I need help as I do a loan. Is there one that exists like that while still private and where I hold my keys? Interested to hear what you guys out there are using.

Is there any that I could recommend to someone that is in his 60s and not technical that would be able to figure it out on his or her own or someone they can trust and call from AAVE or the wallet support for help on that?

Thanks.
