

Hi,

I'm aware there have been issues that people were not able to see the balance but it seemed all sorted recently. However I still can't see my balance of staking \$SEFI...

I must have done something wrong... I can claim my reword but can't see the balance. it says "created a viewing key" when I pressed the Viewing Balance button but nothing happens. In my Keplr I can see claimed Sefi and there's one token, SPYSEFI which I don't think I added... Does anyone know how to fix this?

Much appreciated,

K
