

Esteemed colleagues and blockchain stakeholders,

We are pleased to introduce Govmos into the DyDx forum, spearheaded by the PRO Delegators' validator. Our commitment lies in the establishment of a distinct political cadre, set apart from the majority of validators who are generally commingling their technical roles with politics.

In recognition of the imperative demarcation between the realms of execution and governance, Govmos represents our resolute dedication to this delineation. We have taken the significant step of creating two separate entities, the validator itself and Govmos, to underline the importance of this division.

We want to be pioneers and hope to see more validators following this path in the future.
