

Since we all want to build a strong community, I think it's important to make it more clear how many roles play in our community, and how many votes do these roles have?

Here are some significant roles in my mind:

1. Speculator

Mostly focus on short term prices moving. Only vote for the proposal that can incentive the UNI prices raise.

2. Long term investor

Hold UNI for a long term personal investment.

3. HOLD

Have faith on Uniswap that it will be the cornerstone of the whole DeFi world.

4. Whale

Hold more than 500K UNI and look for a delegate that can represent my interests.

5. Others

I haven't mentioned above.
