

Updates

Executives

- During April, in collaboration with the Ecosystem Scope, a reorganization of the spell work was carried out to which Sidestream, Dewiz and an ex-PE member are contributing in order to deliver executives. During May the 3 teams are engaging daily to discuss on-going spell work, onboard Sidestream into the topic, evolve the spell work process and consolidate good practices.
- April was packed with weekly executives. Dewiz delivered work in 3 spells:
- Crafter role for [April 26th](#) and [May 10th](#) executives.
- Reviewer role for [May 2nd](#) executive which onboarded Spark Lend Protocol.
- Crafter role for [April 26th](#) and [May 10th](#) executives.
- Reviewer role for [May 2nd](#) executive which onboarded Spark Lend Protocol.

Endgame work stream:

- The Endgame farm modules were temporarily put on hold due to Spell work priorities, but we will kick-off the internal peer reviews in the upcoming weeks and finalize the project.
- The implementation of 2 more endgame modules was carried out: [SubDAO tokens](#) and [SubDao Proxy contract](#). Small refinements will need to be made as new requirements have been surfaced.

Collateral onboarding:

- Coinbase Custody:
- The Coinbase Custody Technical Assessment was [updated](#) with the latest information and [voted](#) accordingly by governance.
- Deployment of vault contracts to Goerli was executed.
- The mainnet deployment for this deal is expected on the May 24th executive as long as the [operator](#), `eth_address_a` (coinbase custody account) addresses and updated legal docs are delivered by the [@viridian](#) Arranger and ownership is verified successfully before May 19th EOD.
