

Switching between networks

When a user selects the RabbitHole option and MetaMask is connected, upon clicking the “Confirm Swap” button, a pop-up appears with instructions on how to switch between networks. A switch is only possible from MetaMask, but not from the dApp.

Steps that users have to complete to change the network to RabbitHole:

- Open MetaMask in the browser panel;
- Click the account and choose “Settings” from the drop-down menu;
- Select the “Network” option;
- Click the “Add Network” button;
- Use following parameters:
 - * Network name: RabbitHole
 -
 - New RPC URL:<https://rabbithole.1inch.io/1>
 -
 - Chain ID: 1
 -
 - Currency symbol: ETH
 -
 - Block explorer URL:<https://etherscan.io> [Edit this page](#) [Previous Flow](#) [Next Wallet auto-connect](#)
