

As part of the implementation of [ARB Staking](#), I'm leading DAO working groups to develop recommendations on the staking rewards and delegation components of the system. If you're interested in contributing to either working group, please send me a dm on Telegram @zeroxfrisson

[ARB Staking: Unlock ARB Utility and Align Governance](#)

Parallel workstreams: Staking Rewards and Delegation working groups

In parallel with the development of ARB Staking, we will lead two separate DAO working groups that are focused on aspects of the system that will be implemented after development is complete.

- The Staking Rewards working group will focus on how to fund staking rewards. It will develop a recommendation about whether staking rewards should be funded by sequencer fees, MEV fees, validator fees, token inflation, treasury diversification, and/or DAO venture investments and how to implement such rewards.
- The ARB Staking & Delegation working group will focus on how to define an active contributor to the Arbitrum DAO, delegate incentives, and voting power distribution. It will collaborate with Tally and Karma to develop recommendations on Karma Score formula, the minimum Karma Score required to be eligible for staking.
