

Q. Should we incentivise voting in the Ape Assembly?

Mocaverse does this with XP if they vote on their dao mocana which impacts apecoin aips. (As long as they meet min Quorum numbers)

We could incentivise 1 APE per vote up to a limit. If we have 100 vote every 2 weeks x 5 votes that is 500 every 2 weeks or 1000 APE per month approx.

We could also make this valid only after a quorum level is met?

We would have to cap it though at probably 2000 a month?

So basically for up to 2k APE a month we could 10x voting levels.

That said even just putting things to vote is increasing sign up levels and there will be a delay from signing up to voting.

If you have spent many hours in here, or discord go share your voting retweets/reposts. Just own it.

If we all share the numbers will grow. Many say they want more decentralisation, including big players like [@Machibigbrother](#) (to the point of automation of DAO actions, based on voting) but this is more decentralised than say just GWG making all the choices. We have to ask ourselves do we really want more decentralisation?

Are you willing to help make it a reality?
