

# Change Your Delegation to a New Operator

The following steps are intended for a Restaker that would like to change their Delegated balance to a New Operator.

warning Please follow the recommended steps below to avoid a "partially delegated state". A partially delegated state is when some portion of your assets in Delegated state and other assets in a "queued for withdrawal" or "withdrawal ready for completion" state.

## Process to Change Your Delegation to a New Operator

Step 1: Visit the Operator page for your currently delegated Operator. Click Undelegate .

Step 2: Confirm the two transactions in your Web3 wallet.

Step 3: Observe that your Restaked balances are now 0.0 TVL.

Step 4: Those assets becomes Undelegated from the Operator and Assets and appear in "Pending Withdraw" state.

warning Do not click Unstake the assets at the Operator page. This can cause a partially delegated state. Step 5: Wait for the escrow period to end before continuing. Please see [Testnet vs Mainnet differences for detail](#) .

Step 6: Manually Redeposit each asset. Visit each asset page individually. Navigate to the Unstake tab, click Redeposit .

Step 7: After all assets have been redeposited, visit the Operator page for the new operator you wish to delegate to. Click Delegate button.

Step 8: Observe that your delegation has been changed to the new Operator.

info The Redelegate button on the Operator page is intended to be used only for users that have funds in a "partially delegated state". [Previous Undelegate and Initiate Withdrawal Next Testnet Restaking](#)
