

Hey Arbitrum Community,

I hope this post finds you well.

Recently we(LamprosLabsDAO) started going through and learning about the Arbitrum ecosystem, and in the process, we created a comprehensive mind map using Miro to help visualise and understand the various components that make up this vibrant ecosystem.

The mind map covers essential information that we have gone through as a new user, including protocols, benefits for users, and the governance structure of Arbitrum. We designed it to serve as a learning resource for anyone or any new user like us who wants to gain a deeper understanding of the Arbitrum ecosystem.

You can explore the Arbitrum Ecosystem Mind Map with this link [Arbitrum Ecosystem Mind Map](#).

Feel free to explore the mind map and share your insights! This is a collaborative effort, and we encourage community members to contribute their knowledge.

If you have any suggestions, changes or additional information you'd like to see included, drop a comment, and I'll gladly update the mind map accordingly.

Looking forward to seeing the community thrive through shared knowledge!
