

Hello

It is my first post on the governance of AAVE. Please be indulgent with me if I propose something completely stupid.

My vision of AAVE is to replace in the future a bank. Why to wait to future? My proposition is the following : Is it possible to associate to our deposits a credit card branded aave that would allow to my grandmother to know and use AAVE :-).

I am joking for my GM of course but not to much :-). I see a lot of advantages to link a credit card to AAVE :

- Mass adoption of AAVE,
- Easy process to buy / swap Token through AAVE
- Add incentives by using AAVE to enroll more AAVE users
- Increase TVL and safety module
- proud to be early AAVE user for my grand-mother and I => those news user will take certainly a part in the governance

Hoping I don't tell something stupid, Thanks to all to read me.
