Block Explorers

Blockscout

[Blockscout](#) is a comprehensive, easy-to-use block explorer for viewing, confirming, and inspecting transactions on your L2

Blockscout is live with:

Deep Search : Integrated search capabilities provide detailed information on transactions, tags, and more.

Contract Interaction : Engage with contracts directly through the Blockscout UI.

Contract Verification : Multiple tools are available for swift and reliable contract verification

API Requests : Standardized and customizable endpoints ensure seamless API interactions.

Custom Views : The user interface can be tailored with features like tags, watchlists, and more.

OnDora

[OnDora](#) leverages a multi-ecosystem blockchain search engine for your L2.

Dora Search Engine offers a seamless integration with Gelato L2 chains, allowing users to efficiently extract, visualize, and review network metrics from the genesis block. It features a user-friendly UI, ensuring a smooth user experience and enables tracking of Transfers, Swaps, and Mints within a multi-chain environment

Etherscan

[Etherscan](#) is the leading block explorer and search, API & analytics platform for your L2 chain

Transaction Tracking : View and search for Ethereum transactions, blocks, and addresses.

Smart Contract Analysis : Analyze and verify smart contracts.

Gas Tracker : Monitor Ethereum gas prices.

Token Explorer : Explore ERC-20 tokens and their activities.

Blockchain Analytics : Access detailed data and analytics on Ethereum network activities.

Developer APIs : Provide APIs for developers to interact with Ethereum blockchain data.
