

Hey guys !

I made a thread with great affection on twitter, with the aim of helping people who had not had any contact with web3 yet, I showed it in a didactic way and with a printscreen, step by step so that the person can create a crypto wallet, create an account at a brokerage and be able to buy your first \$APE token, to be able to start interacting with us here in the ApecoinDAO community, I explained it well, if I manage to help a single person, it was already worth all the effort, I did it at first focused on the Brazilian community

, it's in Portuguese language.

I hope I was able to help, a big hug to all
