

## getPaymasterStubData

This method and ERC-7677 is experimental and the API may be broken without bumping the major version.

Returns stub values to be used in paymaster-related fields of an unsigned user operation for gas estimation. This method calls `spm_getPaymasterStubData` and is part of the experimental [BRC-7677 specification](#).

## Usage

```
example.ts client.ts ``
```

File example.ts import{ paymasterEip7677Client }from"./client" import{ sepolia }from'viem/chains'

[illegible]

## Returns

- Type:
- GetPaymasterStubDataReturnType

The paymaster values to be used in the paymaster-related fields of a signed user operation.

For EntryPoint v0.7, the return type is:

```

{ paymaster: Address, paymasterData: Hex, paymasterVerificationGasLimit: bigint|undefined, paymasterPostOpGasLimit: bigint|undefined }

```

For EntryPoint v0.6, the return type is:

```

{ paymasterAndData: Hex }

```
