

FAQ 1. What price oracle do you use for the various triggers (prescheduled actions that happen in the future)? 2. 1. USD price-based triggers: 3. 2. the price is retrieved from CoinGecko; 4. 3. VOL-VOL price based triggers 5. 4. : liquidity pool price is used 6. 5. VOL-VOL price based triggers with duration setting 7. 6. : CoinGecko price is used 8. 7. Ratio-based triggers: 9. 8. liquidity pool price is used; 10. 9. Ratio-based triggers with duration setting: 11. 10. CoinGecko price is used. 12. 11. Limit Orders: 13. 12. liquidity pool price is used; 14. 13. 15. What asset pairs / pools do you support? 16. 1. Currently Aperture maintains a whitelist of the top pools for Arbitrum & Ethereum that are based on trading volume and TVL. [See the pairs here](#) 17. 2. . 18. 3. 19. How many pre-scheduled actions can I have open at once and where can I see them? 20. 1. You can have 3 rebalance triggers & 3 close triggers open at once. We will execute based on whichever trigger condition is met first. All remaining open triggers will be negated as you will now have a new position ID. 21. 2. Each address can have a maximum of 50 triggers setup. If you wish to have more than 50 triggers please reach out to [whales@aperture.finance](mailto:whales@aperture.finance) 22. 3. You can see the triggers under the position detail page. They will exist in a purple box. 23. 4. 24.

1. I have provided liquidity, but why can't I see any APTR rewards on the airdrop dashboard?
- 2.

Airdrop dashboard is not realtime and your rewards will be updated sometime after the campaign ends as team will collect the data on how much fees users have generated during the campaign period.

1. Why am I receiving the following error when setting up a Recurring Rebalance trigger on Manta: "Your create strategy request has failed: Error: AxiosError: Request failed with status code 400"?
- 2.

It's because Recurring Rebalance is not supported on Manta.

1. What happens to my unclaimed fees after rebalancing?
- 2.

Your fees will be added to the new position after rebalancing.

1. Hello, I have an avax-usdc LP that is no longer showing up
- 2.

\*Looks like you had your funds stuck on Aperture vaults on Avalanche network. You can withdraw it from here <https://legacy-app.aperture.finance/>\*

## General

1. Is there any fee charged by Aperture for token swap?
- 2.

Gas fees are charged for swaps, but Aperture does not charge any fees.

1. Is the APTR token live yet?
- 2.

We have not conducted a Token Generation Event (TGE), so please be cautious of scams.

1. I received the "Internal JSON-RPC error" when swapping on Aperture. What should I do?
- 2.

Change your RPC to a different one, then refresh the page to retry. You can connect your wallet <https://chainlist.org/> and select another RPC.

1. How do I get OG roles?
- 2.

This is for those who invested in Aperture vaults on the Terra classic network prior to the collapse of Terra/UST.

## ApertureSwap

1. Is there a dashboard that I can view all available pools on ApertureSwap?
- 2.

\*There you go: <https://www.geckoterminal.com/manta-pacific/apertureswap/pools>\*

## LP Tooling

1. What is the difference between automated rebalancing and recurring rebalancing?

2.

Automated rebalancing happens once while recurring rebalancing keeps on executing every time your trigger condition hits.
