

Verify Smart Contract using CeloScan

Verifying a smart contract allows developers to review your code from within the CeloScan Block Explorer

- Navigate to theContract
- tab at the Explorer page for your contract's address
- ClickVerify & Publish
- to enter the smart contract verification page
- Select theCompile
- type,version
- andlicense
- .
- Enter the Solidity Code of the contract along with the constructor arguments.
- Complete Captcha and clickVerify and Publish
- .
- If done correctly, you should see the following screen.[Edit this page](#) [Previous Verify with Celo Explorer](#) [Next Verify with Remix](#)
