Nomination Statement

Concise statement on why you are running for the Special Council

I'm always looking for opportunities for the APECOIN token & our DAO, I can identify them very quickly due to my experience & WEB3 connections.

Im a big advocate for Apecoin adoption, I feel like its one of the best tokens! Not only for gaming - also for items exchange of any kind.

I was one & only who dropped 3 collection for sale in Apecoin on ETH Chain. I was early and its ok. Now i See exchange opportunities for APE token everywhere, and also bought a lot of things with it. I just love it!

i'm very outspoken about our TOKEN and APECOIN dao every chance i get from small IRL or privately invited events to big conferences like ETHDENVER and its elevated pro retrieve second part of the conference, different chains and developed layers events and WEB3 startups presentations, DEFI clubs and my private tea parties that been going on as a tradition for more then 15 years, and specially in the past years when i had more chance to organise my own things to gather the WEB3 minds.

I am well educated in technology and several relevant studies, beside speak at list 3 languages (not just WEB3 languages).

This also helps me to provide accurate information & technologically relevant.

My vast support & promotional help experience with directions of development is crucial here to well communicate with different types of individuals & representatives plus find a common ground of understanding between everyone.

I listen to the community all the time and all of me resent AIPs come from what community felt like needed.

And when i see some amazing idea or something can can become one- I support its development every time i have a chance by just telling how it mind be done easier, faster showing available tools.

Besides all this I constantly brainstorming about possible strategies of the Apecoin DAO expansion & support any good initiatives.

Its also important to stay on alert for any regulatory changes in the DAO and outside it, that mind affect it. Its important to provide timely and accurate services for all constituents and inform everyone about any updates as soon as they come up. And I know It mind sound like to regulatory language - its important to don't forget that this is a real registered Foundation that has to follow surten regulations due to its physical foundational location.

Thank you so much for considering me & support. You mean a lot to me & this DAOs future together! Lets Rock!

Motivation

Details on your motivation for becoming an ApeCoin DAO Special Council member

I can not even express how much this DAO means to me.

Not just how i got here by chance but who i met & connected with and how this is and will affect many of us. I was to keep it operationally professional orderly and IRL inviting, transparency is a must and things on time done as needed.

2 years ago I was hit by a car and still on physical recovery, which i took as opportunity to dive even deeper into WEB3, wrote a first WEB3 book with apes, helps some develop stories for the future projects, became a part of some white papers , speaker at conferences, tester for WEB3 games, part of multiple full IP rights NFT communities besides just being DEFI & stock person (including one of those OG apes AMS/GME that DRS... on which BAYC was bases to OMENAJE in part as founders mentioned at their interview), Became an ape, miss the yatch... , get into Apecoin DAO from day zero practically and was amazed by all people coming here and brainstorming together, became WG0 non payed steward, start spreading my experience at IRLs & conferences. And I cant stop continue helping.

So its a good time for me to finally make it official & apply.

Thank you all so much for considering me & being you, bringing innovation , light & build opportunities here & just helping others. Now you tell me what else you need from me.

Rationale

Share relevant experience and skills that will bring value to the ApeCoin community

I been is DEFI for about 4-5 years deep & at NFTs for about 4 years now, I started on Binance game related collectibles and that how I went into deep dive in education and reserch

Obviously my tech and other studies helped a lot

I start learning more about ETHFOUNDATION and what was build, so I mostly migrated here and learned more about IP RIGHTS, became a part of many DAO or helped starting them, be a part of white parers for DEFI DAOs, saw how so many of my skills were transferable & became amazed with such a fast development of everything...

Became a lil ape and with my first Apecoin started at this DAO, became WG0 unpaid Stuart ,

learned about many initiatives & met amazing folks

Learned more about Hackathons and opportunities for me as a Speaker at private events and big Conferences at ETHDENVER about companies direction in WEB3, security & safety, adjusting the startups workers settings & helping with technology

I keep learning every day and try to be the first to test something in WEB3 from platform to a chain to a layer to a WEB3 game, brake it maybe and improve

And obviously spread the word about it

Specially about Apecoin DAO and opportunities that can be build for all of us

Talking about it at the conferences & private meetings all the time, WEB3 events and DEFI clubs from Harvard business school & MIT to bitcoin folks and WEB3 startups

Specifications

Further describe relevant experience, including crypto and governance participation, and/or ideas for DAO improvement

Part of many DAOs, DEFI clubs, connections with WEB3 conferences, speaker and researcher, at WG0 steward at APECOIN DAO initiation, was here from the day almost zero, participating in the governance votings of some other DAOs, was a part of the white-papers and pre-assemblies of some DAO on the initiation stage, deep into DEFI for about 4-5 years , NFTs for about 3-4 years, wrote the first WEB3 book about apes with them & writers, helped develop stories for the future projects, part of NFT Full IP Rights communities, Passionate about Hackathon opportunities on different chains, Deployed on different chains my own contracts, NFTs, VR art, Photography & 3D builds, First person to deploy & sell in APECOIN the NFT on ETH network and created several collections in APECOIN. Actively participating in IRL events by different DAOs & developments events by Blockchains finding opportunities & connecting people. I always bring out DAO token into the conversations, including at VC & small groups of more "private" developers and showing them the possibilities of this token with examples.

Concluding Statement

Summarize your statement as to why you are the best choice for Special Council

I'm very outspoken about our TOKEN and APECOIN dao every chance i get from small IRL or privately invited events to big conferences like ETHDENVER and its elevated pro retrieve second part of the conference, different chains and developed layers events and WEB3 startups presentations, DEFI clubs and my private tea parties that been going on as a tradition for more then 15 years, and specially in the past years when i had more chance to organise my own things to gather the WEB3 minds.

I am well educated in technology and several relevant studies, beside speak at list 3 languages (not just WEB3 languages).

My vast support & promotional help experience with directions of development is crucial here to well communicate with different types of individuals & representatives plus find a common ground of understanding between everyone.

My companion for human being or passion for solving things does not affect my firm and steady workflow that has deadlines or must be planned with precision .

So if some AIP has a deadline for help and communication - it has to be done in timely regulated manner.

Im very sticks in regulations and like to check with anyone that is relevant and certified in one or another matter. I have to

mention that I had a red clearance at EU airport authority for 2 of my jobs & special training by Apple & certifications related to the matter of compliance & laws. I had EU experiences with lawyers, banks, credit unions & regulations. I had my own small company too with lots of paperwork & deadlines besides necessary travel.

Attending meeting in time and have a strict schedule was always crucial to me.

Knowing the priorities and be able to manage several conflicting deadlines - its nothing new to me. Even while contracted at the new position at Apple during the lockdown I had to manage my own office and organise everything to make everyone happy top the maximum, without forgetting taking care of myself so I can perform the best.

And while now finishing the physical therapy & some other things that came up - I also maintained a very sticks schedule (with flexibilities as they come along while living a room for margin), not forgetting that now i'm in WEB3 forever) - at the end adaptability is important while maintaining integrity of the DAO functions . Besides its also important to dive deep into AIP and make sure they are in the format that can be applied , so you can always ask for help - its important to have time for it in time. Im a good listener - I want to know what can i do for you at a part of our DAO. Im always open to suggestions.

Lets do it Together!
