

How to claim Lido early stakers airdrop

This is how to claim Lido early stakers airdrop with Etherscan UI

Introduction

Who is eligible to claim Lido early stakers airdrop?

LDO Airdrop could be claimed by early Lido stakers [Here](#) you can find a list of addresses for which airdrops are available.

How to find out the volume of available airdrop?

[Here](#) you can see your airdrop LDO amount. The formula is detailed in the [proposal](#).

Airdrop claiming

1. Check if you are eligible to claim airdrop

Find your address [here](#) and get your index.

If there is no your address [here](#) you are not eligible to claim airdrop.

2. Check if you haven't already claimed your airdrop

2.1 Go to [Etherscan](#) (contract address -[0x4b3EDb22952Fb4A70140E39FB1adD05A6B49622B](#))

2.2 Paste your index on isClaimed method (1 row on [Contract/Read contract](#) tab)

2.3 Press the "Query" button

2.4 Make sure that the method result is false

note if you get true as a result of this step, it means that this reward was claimed earlier, and you can't claim it once again

3. Claim your LDO airdrop

3.1 Open [Contract/Write contract](#) tab on Etherscan

3.2 Connect your wallet to Etherscan with either MetaMask or WalletConnect

3.3 Fill-in Claim method fields with data from [here](#)

- index (uint256)
- account (address)
- amount (uint256)
- merkleProof (bytes32[])

3.4 Press the "Write" button and confirm the transaction in your wallet

3.5 Wait for the transaction to succeed

note in case of invalid input transaction can be reverted That's it!
