

Hi all! We (the website team) have been working on revamping the Secret website and want to create a Learn - Secret DAOs page (similar to the [Secret Tokens](#) and [Secret NFTs](#) pages).

But as there's not a whole lot of info on this yet, could you help me out? Would like to know:

- What would you say are the most compelling use cases of privacy-by default and Secret Contracts for DAOs?
- Do you know of projects that already use Secret Contracts to innovate on DAOs? If so, could you share info & links?

And any other useful info you could think of.

Thanks
