

Tim Beiko (<http://www.twitter.com/timbeiko>, [timbeiko \(Tim Beiko\) · GitHub](#)), Ethereum's All Core Devs' cat herder, and a masterful explainer of all things Ethereum (see [his eip-1559 piece](#), for example), is willing to join LEGO as a council member. His domain would be Ethereum Ecosystem alignment, and I expect the grants made with Tim's facilitation to have a positive impact on both Lido and Ethereum.

If this proposal passes:

- Tim will be added to LEGO council and, consequently, LEGO Gnosis Safe multisig as 7th member, with multisig's becoming 4-of-7 one;
- Tim will be allocated an individual budget of 15000 LDO out of LEGO's communal budget.

If it's rejected:

- No changes to the status quo.

## Proposed LEGO council composition

LEGO will be comprised of 7 individuals with a range of backgrounds and experience each responsible for a specific segment of Lido.

The LEGO committee:

- [@vshvsh](#) - General,. Tech
- [@kethfinex](#) - Admin, Community
- [@Jules\\_Jules1](#) - Community
- [@kadmil](#) - DeFi Integrations
- [@skozin](#) - Ethereum Liquid Staking
- [@katernoir](#) - Validation Tech
- [@timbeiko](#) - Ethereum Ecosystem Alignment

## Proposed LEGO budget changes

Allocate 15000 LDO out of the communal LEGO budget, controlled by the multisig, to Tim's personal budget (timbeiko.eth). Lido's treasury is not changed.

## Vote

The change required doesn't touch Lido's on-chain treasury or core smart contracts, but is not within LEGO's council authority, so a Snapshot vote [is created](#).
