

Installing tKey Android SDK

Add Web3Auth's tKey to Gradle [â](#)

In your project-level `build.gradle` or `settings.gradle` file, add JitPack repository:

```
dependencyResolutionManagement { repositoriesMode . set ( RepositoriesMode . FAIL_ON_PROJECT_REPOS )  
repositories { google ( ) mavenCentral ( ) maven { url "https://jitpack.io"
```

```
}
```

`// <-- Add this line }` } Then, in your app-level `build.gradle` dependencies section, add the following:

```
dependencies { // ... implementation 'com.github.tkey:tkey-android:0.0.5' }
```

 Latest-SDK Check the [latest version of Web3Auth's tKey Android SDK](#) and update accordingly.

Permissions [â](#)

Open your app's `AndroidManifest.xml` file and add the following permission:

```
< uses-permission
```

```
android: name = " android.permission.INTERNET "
```

`/>` Note: The element must be a direct child of the root element [Edit this page](#) [Previous Web3Auth CoreKit tKey Android SDK](#) [Next Initialize](#)
