

Really interesting debate around this proposal, which has certainly provided us with a lot of information to refine our stance regarding our position. In this post , we have tried to remain objective and present how we view the different scenarios and the potential impact of each measure

## Summary of Recommendations

### Protocol Revenue Distribution

- 20% of all protocol revenue routed to the MegaVault and 20% routed to a Vault with a negative correlation to the traders' P&L
- 20% of all protocol revenue routed to the Treasury subDAO
- Above an \$80M level of annual protocol revenue, the Treasury subDAO could consider a buy & stake program

### Setting conditions for Validators

Validators with poor efficiency should be encouraged to delegate validation to top node professionals.

### ETH Collateral and Stablecoin product

Enabling ETH as collateral would allow for better funding rates within the protocol

Trading Rewards from 0.9 to 0.75

Manual Bridge option with 5% fee after 6 months
