

# Supported Assets

This page outlines all the assets users are allowed to collateralise ZeroLend has a diverse range of assets for lending/borrowing, categorized as follows:

## Blue Chips:

- Criteria: Assets with a market capitalization exceeding 100 million and a liquidity of at least 100 million.
- Examples
- : LUSD, DAI, USDC, USDT, WBTC, ETH.
- 

## Yield Bearing:

- These assets contribute to yield-bearing strategies, enhancing the earning potential within the ZeroLend ecosystem.
- Examples
- : stETH (upcoming), rETH (upcoming), and other similar assets.
- 

## High Risk:

- This category encompasses assets that do not fit into the Blue Chips criteria.
- Examples
- : MUTE, VC, eZKalibur.
- High-risk assets offer an opportunity for diversification but come with increased risk, providing users with choices that align with their risk tolerance.
-
