

Hi Group,

In an effort to transfer my APE tokens after buying them on the secondary market, I accidentally copy and pasted the APE contract address into my Metmask and hit send.

So I sent 3,582.225 APE tokens back to the contract because of an erroneous copy and paste.

Take a quick look at the screenshots and TX made in Etherscan. It's pretty easy to see where I screwed up.

Etherscan link:

[Ethereum \(ETH\) Blockchain Explorer](#)

Ethereum Transaction Hash (Txhash) Details | Etherscan

Ethereum (ETH) detailed transaction info for txhash 0x865acc4f0c1cac7b49a26df1461fd246d58ed451826f179d308ae7dbc5d49738. The transaction status, block confirmation, gas fee, Ether (ETH), and token transfer are shown.

Let me know if there is any other information I can provide to resolve this. I'm really hoping it's as easy as returning the tokens back to my Metamask address from the Etherscan transaction.

Metamask address: 0xbBE56B2979a08ff1aA4C2EfD12412ECdb57A12ea
