

I'm sure others will pitch holding meetings or their experience - I will just get proposals written and executed.

The first is to get a UNI-ETH pool ASAP.

Why?

- There is only \$15M in Liquidity for UNI vs. \$1B across the current pools
- UNI holders will be less likely to provide liquidity to the UNI-ETH pool without UNI rewards
- UNI holders who stake in the UNI-ETH pool aren't able to vote while they are staked in the pool
- This is common in defi and expected by LPs

Thanks!
