

# EIGEN Token Restaking FAQ

Please see the [EigenFoundation documentation site](#) for full details on the EIGEN token. This page will only cover behaviors of EIGEN token related to Restaking on the EigenLayer protocol.

## **Can I Restake and Delegate EIGEN without Restaking and Delegating another type of asset (LST or Native Restaked ETH)?**

Yes.

## **Can I undelegate (and unstake) EIGEN without also undelegating (and unstaking) other assets?**

No. Per the [Undelegate from an Operator and Initiate Withdrawal](#), the action of Undelegation queues withdrawal (unstaking) for all restaked assets simultaneously.

## **What is the contract address for EIGEN?**

Please see the Deployments table [here](#).

## **Does restaking it give restaked points, etc.**

Restaking EIGEN does not currently earn Restaked Points in the EigenLayer Web App. Please see [Will I earn rewards for staking EIGEN?](#) for more detail. [Previous Restaked Points Next Restaking Developer Guide](#)
