

Dear Secret Community,

I would like to update that we reverted our initial decision and opted to extend delegation to Posthuman validator.

This was done following questions from the Secret Community and getting more information about the Posthuman contributions to our community, including conversations with Posthuman team.

We will be extending a delegation of 750K Secret towards the Posthuman validator, and we hope that the Posthuman DAO will vote to continue validating the Secret Network.

As stated earlier, we will work to improve our delegation program by creating clearer criteria and more thorough review, as well as more transparency for the next delegation rounds.
