TL;DR: (summary)

We would like to put up for consideration a software upgrade proposal to dYdX Chain Protocol v4.1.0. This upgrade aims to enhance user experience, particularly regarding conditional orders.

Introduction:

Hello dYdX Community,

We're bringing to your attention the latest dYdX Chain software upgrade 4.1.0

Specification:

Detailed information about the v4.1.0 features can be found in the [\(release notes\)](#). This upgrade includes state-breaking changes and requires a [software upgrade governance proposal](#).

Key updates include:

- Skip collateralization check for untriggered conditional orders: [PR #1107](#)
- Deprecate the pessimistic add-to-order book collateralization check: [PR #1377](#)

Recommended Next Steps:

1. Review, comment, and/or discuss this DRC.
2. Monitor the dYdX Testnet [Rollout](#) of the v4.1.0 Software Upgrade
3. After an official binary release, a community member [with sufficient unstaked DYDX](#) may consider submitting an [on-chain proposal for the upgrade](#) on Sunday, April 21st, 2024, around 9:00 UTC.*
4. We suggest aiming for an upgrade block height around Thursday, April 25th, 2024 at 14:00 UTC.*

*These steps are recommendations only. The decision on whether and when to upgrade to v4.1.0 remains with the dYdX community. Please note, the timing may change depending on a successful dYdX testnet proposal and the official binary release.

Resources:

- For a comprehensive overview of the dYdX Chain Protocol v 4.1.0 upgrade, visit the [Github release page](#).
- Learn more about submitting proposals: [Submitting a Proposal](#)

Your active participation is key to the governance and continuous improvement of the dYdX platform. We look forward to your feedback and to advancing the dYdX Protocol together.
