

# Event Indexing

Events are updated every minute

## Events

GET /v0.1/events

Get a list of historical events that happen on the Clusters application that can be replayed to get the full state.

Name Description fromTimestamp (optional) The unix timestamp to start your filter from nextPage (optional) Specify the next page in the response sortBy (optional) oldest or newest Defaults to oldest limit (optional) How many rows to return. Defaults to 1000 Note: If you use the nextPage query param, fromTimestamp will be ignored.

## Example

...

Copy <https://api.clusters.xyz/v0.1/events>

...

## Response

List of events 200 500 ...
