

Entity name and location

Hello, we're the w3coins team. We are eager to become part of the dYdX community, leveraging our validator expertise to construct a resilient decentralized dYdX Chain.

Portugal, Ukraine.

Infrastructure location

US, Canada, Europe

What kind of hardware do you run? Baremetal, cloud-based...? In what geographic regions?

We use Bare metal and cloud-based servers , located in Europe , Canada and US .

Technical make-up of team (elaborate on no. of dev ops engineers, experience, etc.)

Our team has 11 members, including four seasoned devops engineers who possess eight years of server administration experience.

Years of experience

What other networks are you running validators for?

Currently we're validating major projects such as: Cosmos Hub, Injective, Oasis Network, Avalanche, Band Protocol, Everscale, Nym, IRISnet, Secret Network, Akash Network, Regen, Umee, Agoric, Nodus, Fetch ai. Also we've been participating in various testnets projects. Consequently, it enabled us to collect extensive expertise, infrastructure, and resources for maintain POS networks.

Do you have a validator voting framework and process?

We are actively involved in the community of our projects and take part in important proposals. We don't miss significant voting and trying to participate.

Are you planning to play any additional roles in the dYdX ecosystem (e.g. market maker, trader, indexer, front-end, other)?

Yes, we are keenly interested in trading and its optimization.

Are there other products or services you want to highlight that could be relevant for dYdX?

we could make many technical contributions such as : Explorer, relayers , monitoring tools, rpc, state sync service, snapshots etc. Also we'll share about Dydx through our social media.

Our team interested in becoming early validators and are enthusiastic about exploring possibilities for collaboration.
