

Queries

All query messages are described below. A custom struct is defined for each query response.

config

Returns the configuration for the contract.

```
{ "config" :  
  {} }
```

vesting_account

Returns all vesting schedules with their details for a specific vesting recipient.

```
{ "vesting_account" :  
  { "address" :  
    "neutron..." } }
```

vesting_accounts

Returns a paginated list of vesting schedules in chronological order. Given fields are optional.

```
{ "vesting_accounts" :  
  { "start_after" :  
    "neutron..." , "limit" :  
    10 , "order_by" :  
    { "desc" :  
      {} } } }
```

available amount

Returns the claimable amount (vested but not yet claimed) of NTRN tokens that a vesting target can claim.

```
{ "available_amount" :  
  { "address" :  
    "neutron..." } } Previous Messages Next Overview
