

There are two upcoming changes that should have a CIP written to outline the changes.

1. CIP for PFB and non-PFB limits:
2. Validators now limit the number of Payfor-Blob (PFB) and non-PFB transactions included in a block by default.
3. This wasn't initially considered consensus-breaking, but it does have a meaningful effect on users.
4. This, as it affects users significantly and should be included in a CIP.
5. Validators now limit the number of Payfor-Blob (PFB) and non-PFB transactions included in a block by default.
6. This wasn't initially considered consensus-breaking, but it does have a meaningful effect on users.
7. This, as it affects users significantly and should be included in a CIP.
8. CIP for transaction size limit:
9. There's a consensus-breaking limit on transaction size.
10. Even with 8MB blocks, transactions are still limited to 2MiB.
11. Create a CIP for this change, as it's consensus-breaking and affects users.
12. There's a consensus-breaking limit on transaction size.
13. Even with 8MB blocks, transactions are still limited to 2MiB.
14. Create a CIP for this change, as it's consensus-breaking and affects users.

[@cmwaters](#) suggested combining these into a single CIP that covers: 1. Caps on PFB and non-PFB limits 2. Caps on the size of PFBs/transactions
