

Quick Start Welcome to the Quick Start guide for Web3 Functions! Whether you're familiarizing yourself with Typescript Functions, diving deep into Solidity Functions, or aiming to set up simple Transactions, this guide is tailor-made for you.

In this Quick Start, you'll:

- Understand and navigate the Typescript Function process from writing to deployment.
- Master the art of crafting a Solidity Function.
- Get acquainted with the simplicity of Transactions, where no additional coding is required; just pick your contract and function.
- Generate tasks for your Typescript Function, Solidity Function or Transaction seamlessly.
- 

Dive in, and let's get started with Web3's Functions functionalities!
