

Hi everyone,

I want to address the recent concerns that have arisen regarding the [breach of trust and conflicts of interest](#) within the DGP. The situation involving [@Alexios](#) and the CryptoHondos project demands attention and a collective effort to find a solution with transparency and communication in mind. This post is for the discussion on how to approach the matter and also provides some ideas on how to do so.

## Breach of the Trust

The allegations of Alexios undisclosed involvement with the CryptoHondos project while serving as a trustee have raised valid concerns about conflicts of interest and transparency. No proof has been brought up to affirm the contrary, and a replacement for the grantor role is needed. This situation, if left unaddressed, could undermine the trust and credibility of the DGP.

## Open Debate and Community Involvement

Here's my proposal: Have another selection process for the Grantor role. Instead of having the current trustees vote, I suggest the community come together and vote for their preferred candidate.

### Selection Process for New Grantor:

Interested candidates for the grantor positions can come forward and express their willingness to serve by writing on this post. An AMA session with each candidate, with a predetermined set of questions, will provide the community with the chance to ask questions and gain insights into the candidate's qualifications, perspectives, and approach to the role.

### Community Vote:

Following the AMA session, the community can vote to select the new grantor. This vote can be a poll on the forum or a snapshot. This way we can ensure that the decision is taken by the community.

## Moving Forward

While the current situation is undoubtedly a challenge, it also provides us with an opportunity to reaffirm our commitment to the dYdX DAOs values and principles. By coming together and actively participating in this debate, we can demonstrate the strength of our community and its ability to overcome obstacles.

I'm eager to hear your thoughts. How can we address this situation in a way that strengthens our community and ensures the long-term growth of dYdX DAO. Let's have this open debate with the shared goal of creating a fair, transparent, and effective solution.

Looking forward to your ideas.
