

Ethereum wallets

We support almost all web & mobile wallets. You can also use Wallet Connect for your hardware wallets or if you are using Mobile Safari.

Supported networks:

- Ethereum Mainnet
- Arbitrum
- Base
- Optimism
- Avalanche
- Polygon
- Binance Chain
-

In order to create a bid with an Ethereum wallet, first make sure you are either using a browser with a supported wallet extension installed or you are using that wallet's built in mobile browser.

Note: If you don't have an extension installed, you can still use Wallet Connect

1. Navigate to clusters.xyz
2. and click "Connect" in the header
- 3.

?

Note: If you are already connected to a Solana wallet, disconnect your wallet first.

?

1. Once you click "Connect", you should see a window that looks like this. It will list all of your available wallets on this screen. Click on one and following the onscreen instructions.
- 2.

?

Note: If you have a Solana extensions installed, you will see this window. Click on the first button labeled "Ethereum/Layer2/EVMs".

?

1. Once you are successfully connected, you should see your wallet with your selected network logo in the header.
- 2.

?

To switch to a different network, click on the network logo to get a dropdown of available networks.

?

1. Click on "Create Bid" in the header and follow the instructions.
- 2.
