

Great post from Ed Felten on why verifiers are hard for non-blockchain solutions

[Medium – 4 Sep 19](#)

The Cheater Checking Problem: Why the Verifier's Dilemma is Harder Than You...

A common design pattern in blockchain systems is to have one party do some work and escrow a bond for correct behavior, then invite others...

Reading time: 6 min read

TL;DR

If cops are paid per crime solved, there will be no police.
