

# Get tokens on zkSync

Before beginning your lending or borrowing journey with ZeroLend, it is essential to ensure that the tokens you intend to use as collateral are present in your wallet on the zkSync chain. This can be achieved by either bridging tokens to zkSync or exchanging fiat currencies for tokens.

Explore the official Explorers page provided by zkSync to learn more on how to bridge tokens to the chain. Check it out below

<https://zksync.io/explore#bridges>
