

Hi Everyone,

My name is John and I work at Celsius on the Business Development Team. We are avid fans of AAVE, we use it regularly, and we hope to get CEL Token voted into AAVE V2 in the coming months!

In past experience, we've found that strong communities like yourselves will want to interact with us to get color on any questions, thoughts, or ideas they may have. So we would like to get out in front and open the conversation!

Looking forward to what lies ahead!

Best,

John and the Celsius Team
