

Verify Smart Contract using Celo Explorer

Verifying a smart contract allows developers to review your code from within the Celo Block Explorer.

- Navigate to the Code tab at the Explorer page for your contract's address
- Click Verify & Publish to enter the smart contract verification page
- Upload your smart contract (example: HelloCelo.sol) and it's .json file (example: HelloCelo.json) found inbuild > contracts
- folder.
- ClickVerify & Publish
- Navigate to theContract Address Details Page
- in the block explore to, use theCode
- ,Read Contract
- , andWrite Contract
- panels to view and interact with your deployed smart contract.[Edit this page Previous Verify Contracts Deployed on Celo Next Verify with CeloScan](#)
