

February 2024 Aligned Delegate Compensation

This forum post is the official record of Aligned Delegate compensation for February 2024.

February Compensation

The total payment amount is defined in the Atlas and Governance Scope. Newly ratified changes are as follows:

- Increase in NewGovToken amounts being distributed to PDs and RDs from 30 and 10 million respectively to 60 million and 20 million respectively.
- Change in the ratio of MKR:NewGovToken from 1:12,000 to 1:24,000.
- Change in the number of slots for each type of delegate from 5 to 4.
- A temporary reduction in payment amounts to Prime and Reserve Delegates of 20%.

Based on this, Prime Delegates may earn up to 41.67 (60,000,000 * 1/12 * 1/4 * 1/24000 * 4/5) MKR per month, and Reserve Delegates up to 13.89 (20,000,000 * 1/12 * 1/4 * 1/24000 * 4/5) MKR per month.

Prime Delegates Throughout the Month

The following ADs were Prime Delegates for the duration of February, the top 4 PDs by MKR will remain PDs at the start of February:

- BONAPUBLICA
- Cloaky
- TRUE NAME

0xDefensor was a Prime Delegate for 2 days prior to their [derecognition](#). After this, BLUE became a Prime Delegate as the RD with the highest amount of MKR delegated and remained in that slot for the rest of the month.

February Delegate Payment Amounts

The following table shows the AD payment amounts and destination addresses for this month. Remember that if an ADs Buffer is not full, any compensation goes to filling this before payments are made, further updates on the Buffers may be found below.

This is a total of: 259.83 MKR

.

AD Buffer Updates

The following table displays the payment amounts to each delegate for this month and their AD Buffer status at the end of the month. Note that while the implementation is manual, the Max AD Buffer size will be scaled based on the amount of time they have spent as PD/RD for the month, e.g. if someone has spent the entire month as a PD, their max buffer size will be equal to the max PD payout, if they've spent 10 days as a PD, their max buffer size will be pro-rated to (10 / n) * buffer size , where n = number of days in the month. There are potential griefing attacks if this method is not used.
