

So im still learning as I go!

Anyone have suggestions or more knowledge to share in ways I can be helpful to the community and its governance. I'm sure I'm low on the totempole but that's just for now until I can get on a level that matters to UNISWAP and its people.

Any suggestions or advice is welcomed. I believe in crypto currency as a whole and of course want to see it all succeed whether it takes over all fiat or not.
