

gm blueberries,

keeping it short and sweet...

The Ethereum merge is one of the biggest events in crypto, tons of eyes watching the space. The trading interest is going to be very high leading up to it. I think there's an opportunity for GMX to capitalise on it by running an ETH merge trading competition, similar to the previous one [GMX Trading Competition — Win \\$250,000 USD in Prizes | by GMX | Medium](#) (except exclusively ETH).

If we can time it after the nitro upgrade on Arbitrum this can also help showcase to the masses the improved user experience of GMX post nitro.
