

# Models

## Large language models

The Proof of Sentience API chat API currently supports all OpenAI models.

## Fine-tuned models

The API supports using fine-tuned models hosted by OpenAI. To use your fine-tuned model, you need to:

1. Specify your fine-tuned model name in the model field. For example:ft:gpt-4o-2024-08-06:personal::abcdefg
2. Add an extra headerFine-Tune-Authorization
3. with your OpenAI API key that has the correct access to your model in Bearer format(see code examples below).
