

Fiat/Crypto Onboarding

Secret network has active integrations with:

- Axelar Satellite/app.squidrouter.com
- - Using the Axelar SDK users can bridge Ethereum and other EVM/Non-EVM assets into Cosmos and Secret arriving immediately as Wrapped SNIP-20 private tokens into their Secret account.
- - [Squid](#)
- - is a cheaper (gas wise) version for Axelar based bridging one can use as a widget.
- [Houdiniswap](#)
- /Xblock
- - One can utilise the Xblock integration or Houdini widget to let users onboard Crypto assets like XMR, BTC, ETH and more privately directly into SCRT
- Kado.money
- - Kado supports SCRT and direct Noble USDC onboarding onto Secret network. One can utilise their Widget to allow for in-app onboarding via Paypal, Credit, Debit and more.
- TransAk
- - TransAk support SCRT onboarding using Debit, Credit, paypal and other gateways[Previous Confidential Computing Layer Next Account abstraction](#) Last updated 7 months ago
