

[TEMP CHECK] Add EURC to BASE Aave V3 Instance

Author: ACI (Aave Chan Initiative)

Date: in 2025-01-13

Simple

Summary:

This TEMP CHECK proposes to add EURC on Base V3. EURC is Circle's EUR-backed stablecoin, enhancing liquidity and expanding the platform's appeal to European users. Original proposal is [[TEMP CHECK] Add EURC to BASE Aave V3

](<https://governance.aave.com/t/temp-check-add-eurc-to-base-aave-v3/20423>) but has been reformatted to be governance compliant.

Motivation/Background:

EURC is a fully backed stablecoin pegged to the Euro, issued by Circle, the same entity behind USDC. It is a reliable and transparent Euro-denominated asset gaining adoption across DeFi protocols.

- Utility and Role:

EURC facilitates Euro-based transactions in DeFi, allowing for a stable store of value and an efficient medium of exchange within the ecosystem.

- Backers:

Circle is a trusted issuer with a track record of regulatory compliance, providing confidence in EURC's stability.

- Performance:

EURC has demonstrated consistent performance and adoption within the broader DeFi space such as Morpho (3M), Alien(4M) and Aerodome (3M).

- Euro Liquidity:

EURC will offer Aave users access to Euro-denominated liquidity, appealing to the European market.

- Broader User Base:

Listing EURC could attract new users from Europe, diversifying Aave's stablecoin offerings.

- Increased Liquidity:

The addition of EURC can enhance liquidity across Aave's markets, improving lending, borrowing, and trading experiences.

Chain to be Deployed/Listed:

- Chain:

Base

- Parameters:

Initial Risk Parameters will be provided by Risk service providers during the ARFC phase.
