

On November 8th, LDO rewards for Balancer v2 wstETH/WETH LP will expire, and Curve stETH/ETH LP rewards are set to expire on November 10th.

From our dedicated [analytical dashboard](#), it looks like the current incentivization level helps maintain consistent growth of both pools. Liquidity in the pools costs Lido around the same [LDO amount per month \(per \\$1000\)](#) in Curve and in Balancer, with Curve being just a little bit more cost-efficient. Great thanks to Lido analytical team for putting this dashboard together

Based on this data, we propose to continue rewards for both pools at the same level:

- 3,550,000 LDO for the next 30-days period of incentivizing Curve LP
- 300,000 LDO for the next 4-weeks period of incentivizing Balancer LP

If you have any objections about these rewards allocations, please comment here, and we can run a snapshot voting. Otherwise, it will be included in the weekly Omnibus vote on Thursday, November 4th.
