

Overview

This page details the different kinds of signup/login flows you can offer your end user.

External/Branded Wallets

Dynamic supports multi-chain and multi-wallet signup and login. Learn all about how to enable and handle this in [the Branded Wallets overview](#) .

Email & Social

Email and Social login can come with an embedded wallet or without. If you do not want an embedded wallet you can jump straight to [the configuration section for email/social](#) .

Embedded Wallets

Embedded wallets are non-custodial wallets that are generated for your users when they sign up for the first time. You can learn more about the different kinds in the [Embedded Wallet section](#) .
