

List: Chains, Bridges, DEXs, Solvers

We're continuously adding new blockchains, bridges, exchanges, aggregators, and solvers. It is essential to note the keys and IDs which you can find in the [Extended Overview](#) since they are used in our SDK/API.

204 (✓)\* - Due to recent hacks on Harmony Bridge & Nomad, the liquidity on these chains is very limited and while technically supported, not recommended to bridge to.

(✓)\*\* - Due to the Multichain crash those chains are not connected anymore, we will reenable them with connections from other bridges

(✓)\*\*\* - Solana currently has limited support. We support bridging USDC from Polygon and Ethereum to Solana. And it is only available through our [API](#).
